

We are looking for a Senior Backend Developer (Django)

The 360 Code Lab is part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Located in the heart of Warsaw, featuring a uniquely modern office space within the Warsaw Spire Tower, the aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto *Be different in order to generate great results*, dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. We want to give you the ideal environment, to break conventional thinking patterns, develop disruptive ideas, find creative solutions and implement projects dynamically.

Main Activities

- Design, implement and improve features in a mature Django installation including REST APIs, microservices, data ingestion and video streaming
- Write and maintain scalable, performant code that can be shared across platforms
- Meaningfully contribute to the product and core backend systems by suggesting and executing improvement
- Improve engineering standards, tooling, and processes
- Debug production issues across services and multiple levels of the stack
- Work in an agile environment with an excellent team of engineers

Technical Requirements

- Experience in Python and Django (3+ years)
- Experience and familiar in Tornado
- Basic Frontend skills (HTML5, CSS3, JavaScript, jQuery) required
- Basic knowledge of SQL and NoSQL solutions
- Experience in fresh Django installations on web servers
- Deep understanding of horizontal scaling and ways of cost optimization
- Good understanding (or real experience more preferable) with AWS and Google Cloud Services
- Experience in working with Git
- Familiar with different kinds of software architecture

Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science or equivalent educational or professional experience and/or qualifications
- Strong analytical and conceptual skills, with a curious mind for troubleshooting and software building
- Focused on automatization and microservice architecture
- Ability to understand business requirements and transform them into technical requirements
- A solid understanding of software development life cycle (SDLC) and programming fundamentals
- Strong interest in new technologies and willingness to learn
- Hands-on mentality & Can-Do-Attitude with a knack for benchmarking and optimization
- Excellent oral and written communication skills and ability to work with technical and non-technical staff
- Fluent in English, both written and verbal. Russian language skills highly appreciated

Internal and
external
trainings

We are burning to break new ground, break traditional thinking patterns and implement creative solutions. We are looking for people who want to shape our company and make a difference, and for whom a responsible, respectful togetherness is a matter of course. If you can identify with that, you're well on the way to starting a long-term career with a successful, internationally expanding company. Send your application and CV to: hr@360codelab.com or use the **apply** button below.
