

We are looking for a Senior Frontend Developer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- Development of web applications for international business and end customers together with a team of experienced software developers
- In the agile SCRUM team, you are involved in the complete software development cycle (from requirement analysis through implementation and quality assurance to deployment and ongoing operation)
- Implementation of design ideas in HTML5 and CSS3 as well as modern UI frameworks (bootstrap, material, foundation framework)
- Implementation predominantly with SPA frameworks (React, Angular, Vue) and REST backend
- Ensuring optimal functionality and usability on popular web browsers and mobile devices
- Implementation of REST WebAPIs with .NET

Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science, or equivalent educational or professional experience and/or qualifications.
- Excellent analytical and social skills with the ability to work successfully across all engineering disciplines.
- Strong interest in new technologies and willingness to learn and curiosity
- Hands-on mentality & Can-Do-Attitude.
- Maturity, judgement and proven ability to build strong relationships.
- Fluent in English

Technical Requirements

- Experience with Microsoft C# and .NET stack (2 years)
- Deep understanding of web technologies like HTML5, CSS, Javascript (2 years)
- OOP knowledge and web technologies (web services, REST, OWASP TOP 10)
- Knowledge about SPA frameworks is welcomed
- Experience with relational databases (SQL-Server) and ORM (NHibernate, Entity Framework)
