

# We are looking for a Senior Backend Developer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

## Main Activities

- Design, implement or improve features in a variety of back-end systems including our REST APIs, microservices, data ingestion and processing systems
- Write and maintain scalable, performant code that can be shared across platforms
- Meaningfully contribute to the product and core backend systems by suggesting and executing improvements
- Improve engineering standards, tooling, and processes
- Practice test-driven development
- Debug production issues across services and multiple levels of the stack

## Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science, or equivalent educational or professional experience and/or qualifications
- Strong analytical and conceptual skills, with a curious mind for troubleshooting and building software
- Focused on automatization and microservice architecture
- Ability to understand business requirements and translate them into technical requirements
- A solid understanding of software development life cycle (SDLC) and programming fundamentals
- Strong interest in new technologies and willingness to learn and curiosity
- Hands-on mentality & Can-Do-Attitude with a knack for benchmarking and optimization
- Excellent oral and written communication skills and an ability to work with technical and non-technical staff
- Fluency in English, both written and verbal

## Technical Requirements

- Experience in Java (5+ years)
- Experience in Kotlin would be a plus
- Elasticsearch knowledge
- Experience working with third-party developer tools (e.g., APIs, SDKs, client libraries)
- Experience with relational databases
- Thorough understanding of web protocols
- Familiar with Linux Operating systems
- Experience with Docker
- Experience with AWS would be a plus
- Interested in DevOps

travel abroad

Software develop-  
ment projects for  
global markets

Involvement in  
whole develop-  
ment cycle

English lessons

Private  
healthcare

Young, talented  
and motivated  
team

Internal and  
external  
trainings

We are burning to break new ground, break traditional thinking patterns and implement creative solutions. We are looking for people who want to shape our company and make a difference, and for whom a responsible, respectful togetherness is a matter of course. If you can identify with that, you're well on the way to starting a long-term career with a successful, internationally expanding company. Send your application and CV to: [office@360codelab.com](mailto:office@360codelab.com) or use the apply **button** below.
