

We are looking for a Senior Devops Engineer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- Delivery of secure, robust, scalable, highly available and self-healing cloud environments on AWS
- Knowledge sharing and collaboration through effective documentation and verbal communication
- Participating as part of a distributed agile (Kanban, Kanplan or Scrum) team

Technical Requirements

- Background in scripting
- Working knowledge of certificates and CAs, encryption
- Technically strong python and bash coder
- Understands and has worked with AWS Elemental Media-Live, MediaStore, MediaPackage and video streaming
- Understands and has worked with AWS multipart upload API
- Able to build servers from scratch
- Experience with containerisation especially docker, ansible
- Understanding of WebRTC signalling
- Experience working with – and configuring - matrix-org, synapse, sydent, and/or messaging clients built on top would be a plus
- Experience with VOIP, VoD, OTT would be a plus

Skill Requirements

- Scripting – bash, python (especially Twisted)
- Database – configuring and maintaining health of PL/SQL RDS at scale
- Automation experience – both server and serverless
- Autoscaling experience
- Broad range of AWS skills (certification preferred)
- Familiar with automation (CI/CD) tools and processes
- Able to communicate (verbally and in writing) fluently, in English
- Be an astute and proactive contributor in pragmatically balancing service scope vs cost
- Knowledge and experience of instant messaging services and systems would be a bonus
- A background that includes experience or familiarity with applications built in Flutter, Java, Kotlin, C# or swift, would be a plus
