

We are looking for a Senior Frontend Developer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- Develop new user-facing features of web applications
- Build reusable components and front-end libraries for future use
- Translate designs from zeplin and wireframes into high quality code
- Optimize components for maximum performance across a vast array of web-capable devices and browser
- Be a part of the day to day activities of a team of Product Developers
- Contribute to a technical product roadmap
- Learn new technologies, such as ReasonReact
- Evaluate and implement new technologies into the current development process
- Assist in the creation and maintenance of technical standards
- Takes active participation in technical training and mentoring for junior team members and cross functional teams

Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science, or equivalent educational or professional experience and/or qualifications
- Strong analytical and conceptual skills, with a curious mind for troubleshooting and building software
- Ability to understand business requirements and translate them into technical requirements
- A solid understanding of software development life cycle (SDLC) and programming fundamentals
- Strong interest in new technologies and willingness to learn and curiosity
- Hands-on mentality & Can-Do-Attitude with a knack for benchmarking and optimization
- Excellent oral and written communication skills and an ability to work with technical and non-technical staff
- Fluency in English, both written and verbal

Technical Requirements

- 5+ years' experience professionally developing software
- Thorough understanding of React.js and its core principles (2+ years)
- Experience in Node.js
- Deep understanding of web technologies like HTML5, CSS, Javascript (2+ years)
- Understanding of responsive/mobile web design
- OOP knowledge and web technologies (REST, GraphQL, Git, etc.)
- Experience with relational databases
- Functional Development skills and open to learn Reason-React
