360° code lab

We are looking for a

Senior Mobile Application Developer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- Delivery of quality software written in Flutter
- Participating as part of a distributed agile (Kanban, kanplan or scrum) team

Skill Requirements

- Skills across multiple software development platforms and tools. Specifically, Android and/or iOS development
- Experience building cross-platform apps using Flutter
- Experience with APIs, and building and maintaining Dart SDKs
- Advanced user of git
- Experience writing unit tests
- Background in messaging apps highly desirable
- Experience collaborating with product and design thinkers, turning supplied designs into code
- Understanding of system design, performance, scalability data structures and algorithms
- Familiar with automation (CI/CD) tools and processes
- Able to communicate (verbally and in writing) fluently, in English

Technical Requirements

- Background in commercial Flutter development
- Working knowledge of certificates and CAs, encryption
- Technically strong OOP (one or more of kotlin, swift, java, objective C)
- Able to articulate the benefits of writing code according to SOLID principles (and others)
- An advocate for patterns such as MVC, BLOC, repository (for example)
- Understands principles of Agile estimation
- A pragmatic attitude to delivery, able to balance deadlines with technical requirements and scope
