

We are looking for a

Senior React Native Engineer

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- Contribute and/or lead the development of our new mobile app for our web booking platform
- Work closely with product and design teams to refine the features we build
- Collaborate and participate in building full-scale features with the backend team
- Deliver quality software through comprehensive code reviews and automated testing
- Write automated unit and integration tests to ensure a stable and quality app
- Push your team forward onto the latest and greatest, be it engineering practices, libraries, tools or products

Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science, or equivalent educational or professional experience and/or qualifications
- Strong analytical and conceptual skills, with a curious mind for troubleshooting and building software
- Ability to understand business requirements and translate them into technical requirements
- A solid understanding of software development life cycle (SDLC) and programming fundamentals
- Strong interest in new technologies and willingness to learn and curiosity
- Hands-on mentality & Can-Do-Attitude with a knack for benchmarking and optimization
- Excellent oral and written communication skills and an ability to work with technical and non-technical staff
- Fluency in English, both written and verbal

Technical Requirements

- 5+ years of software development experience; minimum of 1 year of ReactNative experience.
- Already Have developed and published applications for Android and iOS
- Deep understanding of React and its core principles
- Strong proficiency in JavaScript or other backend language
- Experiencing with React workflows (i.e. Flux, Redux)
- Form strong relationships with other members of product dev team
- Highly product-oriented, analytical, and deep thinker
- Experience working in a rapid, Agile environment
- Bonus points if you have Github project(s) and open source contributions
- Bonus points if you have worked in a Test Driven Development (TDD) environment before
- Bonus points if you have Continuous Integration And Continuous Delivery (CI/CD) experience in an Agile Environment
- Bonus points if you experience working with GraphQL
