

We are looking for a Software Developer .NET

The 360 Code Lab will be part of the Austrian based 360 Lab (360-lab.com), which develops innovative products and services and optimizes existing business models for their market conformity. Due to the increasing need for software development within the myWorld ecosystem, an offshore development center will be opened in the heart of Warsaw in 2019 – the 360 Code Lab. The aim of the 360 Code Lab is to develop state of the art technologies and to make ideas become reality. True to the motto: "Be different in order to generate great results", dedicated technology enthusiasts, lateral thinkers and code poets will work together to master even the most complex technical challenges. In short, the 360 Code Lab will be a place where motivated developers will be working on cutting edge projects in a super modern office in the Warsaw Spire Tower.

Main Activities

- You are working together with your team on developing an already on the market established product
- Development is done on Microsoft .NET stack (C#, Asp. NET, .NET full framework or .NET Core)
- In the agile SCRUM team, you are involved in the complete software development cycle (from requirement analysis through implementation and quality assurance to deployment and ongoing operation)
- Ideas are born in the team and implemented in the team
- Either you burn for frontend or backend development, you decide! We also like to use all-round talents as full-stack developers

Skill Requirements

- Bachelor's or Master's degree in engineering, information technology, data communications, telecommunications, computer science, or equivalent educational or professional experience and/or qualifications
- Excellent analytical and social skills with the ability to work successfully across all engineering disciplines
- Strong interest in new technologies and willingness to learn and curiosity
- Hands-on mentality & Can-Do-Attitude
- Maturity, judgement and proven ability to build strong relationships
- Fluent in English

Technical Requirements

- Experience with Microsoft C# and .NET stack
- Knowledge about OOP and design patterns
- Experience with web technologies like HTML, CSS
- Experience with relational databases (SQL-Server) and ORM (NHibernate, Entity Framework)
- Optionally experience with Javascript frameworks like Angular, React, Vue

and motivated
team

Internal and
external
trainings

We are burning to break new ground, break traditional thinking patterns and implement creative solutions. We are looking for people who want to shape our company and make a difference, and for whom a responsible, respectful togetherness is a matter of course. If you can identify with that, you're well on the way to starting a long-term career with a successful, internationally expanding company. Send your application and CV to: office@360codelab.com or use the apply **button** below.
